RE: Sunnyside Tar Sand Unit Feasibility Meeting  
Thursday, April 29, 1982  
2:00 p.m.

Gentlemen,

You are invited to attend a meeting at Sabine Production Company's office on the 35th floor of the Amoco Building, 17th and Broadway, Denver, Colorado, to discuss the feasibility of establishing a tar sand unit in the Sunnyside Area of Carbon County, Utah. Should progress be made toward realizing such a unit, the meeting would be extended through noon, April 30, for the purpose of determining a preliminary Plan of Operations for such a unit and a schedule for completing that plan. Other matters ancillary to the proposed unit and plan as well as to eventual production of the Sunnyside Tar Sand Deposit could also be covered in such a meeting.

Enclosed are tentative proposals for a unit agreement and a definition and acquisition agreement. Please note that these are merely discussion drafts and suggested improvements would be welcome before, and expected at, the meeting. A narrative recommending a unit at Sunnyside is also enclosed which includes outline briefs of the salient portions of a proposed Plan of Operations.

Page 2  
Sunnyside Tar Sand Unit  
Feasibility Meeting

You have been invited to this preliminary meeting since Sabine's records indicate that a unit consisting of the tar sand interests controlled by the invitees would be a viable operation. If sufficient invitees are willing to proceed, all interest owners in the Area of Mutual Interest would be invited to join in later discussions. An examination of the map indicates that any fieldwide unit permitting inclusion of the smaller interest owners is dependent upon Amoco's joinder.

Please let me know if your company will be represented at this meeting and, if convenient, by whom. As this is a preliminary meeting it is suggested that a limited number of representatives would expedite the necessary discussions. If it is decided to proceed, another meeting could be called to inform all who would be participating in the unit negotiations. Suggested changes to any of the enclosures received by April 16 would be incorporated into edited versions and would be mailed April 21 with an agenda.

Your participation in the subject meeting and preparations would surely be appreciated. I am looking forward to hearing from you and working with you on this challenging project.

Yours very truly,

Granville Dutton
